

Whirlwind Steel Manufactures 43,000+ Sq. Ft. Building to House Indoor Soccer and Sporting Facility, Blue Sky Sports Center, located in Allen, TX

Tri-Star Construction, Inc. of Flower Mound, TX, in conjunction with Whirlwind Steel Buildings, a Houston, TX based manufacturer of metal buildings and metal building components, has completed construction of the Blue Sky Sports Center in Allen, TX. The 43,750 square foot building is the third Blue Sky facility that Tri-Star has constructed in the North Texas area.

Allen, TX (Vocus/PRWEB) December 22, 2010 -- Tri-Star Construction, Inc. of Flower Mound, TX has completed construction of a 43,750 square foot indoor sports facility, Blue Sky Sports Center, in Allen, TX. The building, manufactured by Whirlwind Steel Buildings, a Houston, TX based manufacturer of [metal buildings](#) and metal building components, is the third Blue Sky facility that Tri-Star has constructed in the North Texas area.

The new facility is located at 950 E. Main Street and features two indoor soccer fields, a basketball court, a concession stand, offices, a video game arcade, a pro shop and more. The facility is the result of a public/private joint venture between the City of Allen and [Blue Sky Sports](#). This is the third such facility opened by Blue Sky's owner, Mr. Peter Brody. The other two facilities are located in The Colony and Keller.

The building is a concrete tilt-wall structure that consists of two buildings attached creating a high low condition where they adjoin. The low building that houses the offices, pro shop, party rooms and the arcade is a gabled 125' wide by 110' long structure with a 14'-0" eave height. The roof is constructed with 26 gauge Hawaiian Blue Super Span-X [metal roofing](#) panels by Whirlwind Steel.

The second, larger building is a gabled 125' by 240' structure with a 25'-0" eave height. This building, with its column-free clear span space and high tilt walls, houses the two soccer fields, the volleyball courts and the batting cage. The roof is constructed from Whirlwind's 26 gauge Super Span-X panels with an unpainted Galvalume finish.

[Tri-Star Construction, Inc.](#), the General Contractor for the project, has completed many projects utilizing pre-engineered steel buildings over their 24 year history. Many of their projects, including the Blue Sky facility, are handled with a design/build negotiated contract.

Whirlwind Steel Buildings, Inc., in Houston since 1955, is a manufacturer of pre-engineered steel buildings and steel building components for the agricultural, commercial, industrial, institutional, residential and self storage markets.
